CONSULTING ELEVATOR™ SERVICES

“I was very satisfied with the level of service from the NAGLREITER™ team. They integrated very well with both the Fremont and Cork team members. Without their support, completing various aspects of the project would not have been possible within the tight timeline and scope of the project.”

SEAN MCFERRAN,
*Stryker Neurovascular
 Program Manager*

THE PROBLEM

MEDTECH'S INNOVATION CHALLENGES

Getting a medical device to the bedside has never been more challenging. Regulatory scrutiny is growing globally, investments into MedTech are coming later and later, and the multinationals won't acquire technology without real-world data and real-world commercial success.

Navigating this innovation challenge equates to longer development lifecycles and more time for innovation to unlock value. The pressure is placed directly on the innovators to find new solutions for today's MedTech innovation challenges.

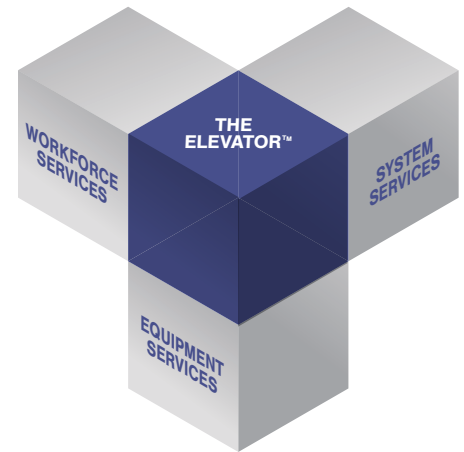

MORE TIME = MORE MONEY = MORE RISK.

THE SOLUTION

BETTER PREDICTABILITY AND IMPROVED EFFICIENCIES AIMED AT MITIGATING THE RISK

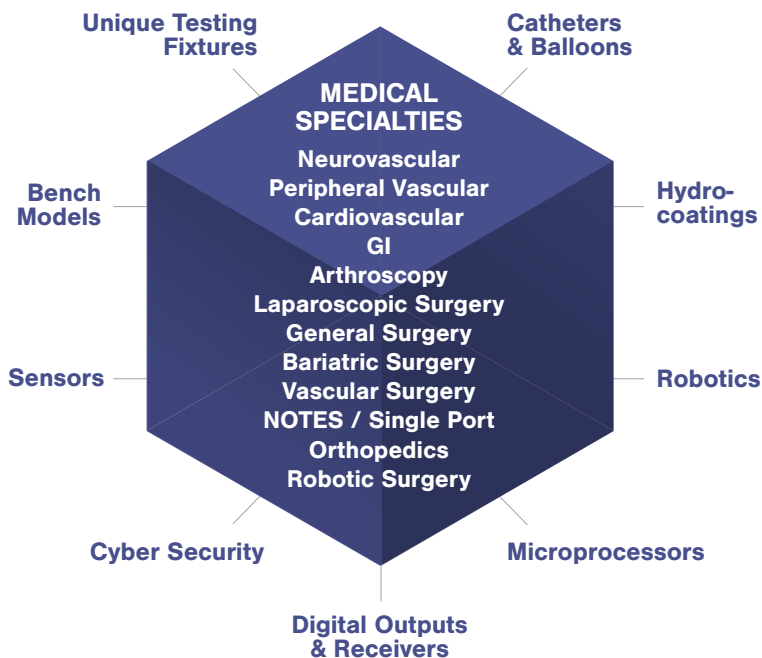

Developed and refined through years of proven success, NAGLREITER's innovative business model overcomes today's innovation challenges by accelerating the entire development process while reducing project and business risk. The ELEVATOR™ Model coordinates design, engineering, manufacturing, clinical, regulatory, fund raising, legal, IP, accounting, and marketing requirements to optimally unlock value towards commercialization.

NAGLREITER SERVICE OFFERINGS ARE FRACTIONALIZED TO THE PROJECT AND/OR BUSINESS:

- A best in class workforce built for innovation
- A state-of-the-art MedTech facility built for innovation
- A robust quality system and coordinated business systems built for innovation
